WAGE THEFT AND PAYROLL FRAUD DISCLOSURE

SUMMARY:

Bidders on certain City contracts, recipients of Assistance, and any of their prospective subcontractors must disclose any wage theft or payroll fraud violations over the last three years. Unless they receive a waiver from the City's Fair Wage Employment Board, violators are placed on the City's Adverse Determination List, which prevents them from entering into new contracts with or receiving Assistance from the City. This disclosure requirement and the waiver process are set forth in Chapter 190 of the Codified Ordinances of Cleveland, Ohio, 1976 ("Chapter 190").

INSTRUCTIONS:

Pursuant to Chapter 190, the information requested on this document must be provided by any person or entity bidding on or making a proposal for a Construction or Improvement Contract or a Service Contract, or applying for Assistance, and any of their prospective subcontractors.

Any person or entity that is deemed to have made a false statement shall be declared to have acted in default of its contract and shall be subject to the remedies for default contained in its contract.

DEFINITIONS:

"Adverse Determination" means a final action or adjudication that the person or entity in question has committed Wage Theft or Payroll Fraud and is further defined in Chapter 190.

"Assistance" means any form of City financial assistance, except for financial assistance provided for the development, rehabilitation or other means of providing residential housing. Assistance does not include financial assistance which is received from another government or other entity with the City acting only as a conduit or fiscal agent for the funds, where the City exercises no control over the identity of any recipient or of the terms of the contract. Community Development Block Grant Funds are not considered conduit funds and, to the extent they otherwise qualify, are included as Assistance.

"Construction or Improvement Contract" means any contract entered into pursuant to Chapter 167 or Chapter 185 of the Codified Ordinances.

"Payroll Fraud" means concealing an entity's true payroll tax liability or other financial liability to a government agency from government licensing, regulatory or taxing agencies through misclassification of employees, failure to report or underreported

payment of wages, or executing a cash transaction while failing to maintain proper records of reporting and withholding.

“Service Contract” means any contract or subcontract between a person, business or corporation and the City of Cleveland that primarily involves the furnishing of services to the City (as opposed to the purchase of goods or other property or the leasing of property), and shall be limited to the following categories of services: food service, janitorial, security services, parking lot attendants, home health care, health care aides, waste management, automotive repair services, landscaping, towing contracts, building and maintenance services, carpentry, clerical services, urban forestry, housekeeping, street maintenance and repair, and sidewalk maintenance and repair. II, Sec. 34a; RC Chapters 4109 or 4115; RC 4113.17, 4113.18, 4113.52 or 4113.61; or a violation of any substantially equivalent federal or state law; as any of these laws may be amended or superseded.

CFO Firefighter Hood Specification Sheet

Applicable Standard: NFPA 1970-2025, *Standard on Protective Ensembles for Structural and Proximity Firefighting, Work Apparel, SCBA, and PASS*. This standard- consolidates previous PPE standards (including NFPA 1971) into a single document and establishes mandatory particulate-blocking requirements for structural firefighting hoods.

1. Intended Use

- Structural firefighting operations requiring head and neck protection under helmets and around SCBA facepieces.
- Hood must provide thermal and particulate protection as an interface element of the full protective ensemble.

2. Design Requirements

a. Physical Coverage

- Full coverage of the head, neck, and significant portions of shoulders/chest when worn properly under helmet and around SCBA mask.

b. Material Specifications

- Constructed of flame-resistant textile composites capable of resisting thermal insult and mechanical abrasion.
- Material layers include protective outer fibers and a particulate-blocking barrier layer to stop harmful particulates.

c. Particulate Barrier

- Mandatory particulate-blocking hood for structural firefighting.
- Barrier must cover essentially the entire hood surface, except minimal allowable areas near seams/ openings.

3. Performance Requirements

a. Thermal Protective Performance (TPP)

- Hood composite must meet or exceed minimum TPP values consistent with PPE thermal protection performance testing.

b. Particulate Filtration Efficiency

- Must block *at least* 90% of particles between 0.1 um and 1.0 um passing through the hood barrier media.

c. Total Heat Loss (THL)

- Hood must demonstrate a *minimum total heat loss value* to balance particulate protection with breathability and prevent excessive heat stress.

d. Flame Resistance and Shrinkage

- Materials must exhibit flame resistance and limited thermal/acrylic shrinkage after conditioning.
- Seams and barrier layers are subjected to thermal and wash + heat conditioning before performance testing.

4. Mechanical and Durability Requirements

a. Seam Strength

- Hood seams must remain intact and maintain barrier effectiveness under mechanical loads, temperatures, and laundering cycles.

b. Burst Strength

- Hood materials must withstand specified pressure loads without rupturing.

c. Wash and Heat Conditioning

- Prior to testing, hood materials and seams are preconditioned (wash cycles+ specified heat exposure) to simulate service life.

5. Health, Safety, and Restricted Substances

a. Restricted Substances

- Materials should comply with restricted substance limits (e.g., PFAS restrictions) as defined in NFPA 1970, allowing manufacturers to label hoods as "PFAS-free" when applicable.

b. Contaminant Removal Efficiency

- Manufacturers will report decontamination effectiveness metrics based on standardized cleaning tests (percent removal of organic/heavy metal contaminants).

6. Labeling & Certification

a. Certification

- Hoods must be tested and certified by an independent third-party certifier (e.g., UL Solutions or SEI) to confirm compliance with NFPA 1970.

b. Identification

- Permanent labels must include: Manufacturer identification, model number, applicable standard edition, size designation, and care and laundering instructions.

7. Care, Maintenance & Service Life

- Follow NFPA 1850 (PPE care and maintenance standard) for formal inspection, cleaning, and retirement criteria. Hood aging, barrier degradation, or compromised fit should prompt removal from service.
