

Welcome!

_____ to the _____

Shaker Boulevard

Community Open House 2.0

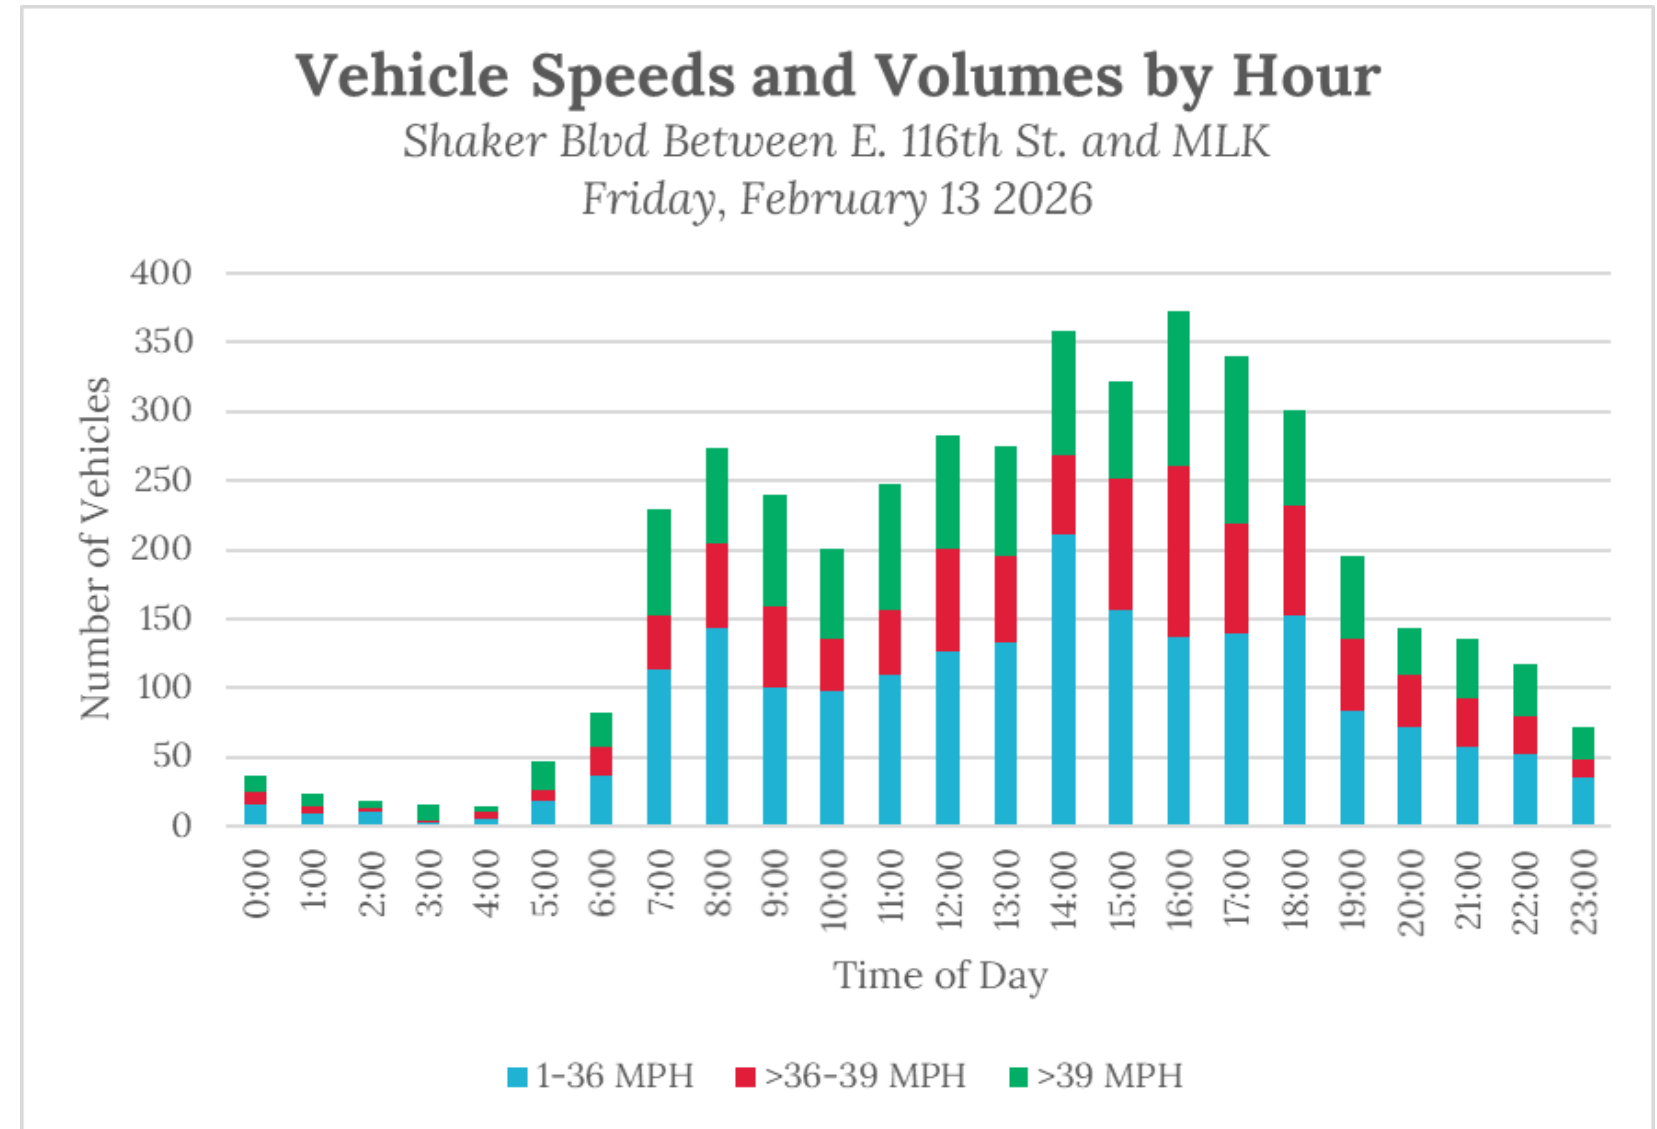

We've heard so *much* about speeding and dangerous driving

- Vision Zero – 2022
- Cleveland Moves – 2025
- Polling: 75% of Clevelanders agree that The City should invest more resources in improving biking, walking, and public transit

... and the data agrees

- Over half of vehicles are traveling over the 35 MPH speed limit
- 3 serious, life altering injury crashes over the last 5 years
 - 150 total crashes in project limits during that time

Key community engagement themes from Cleveland Moves

Elements under consideration to be addressed as part of this project on Shaker Boulevard:

- More protected, connected, high comfort infrastructure
 - Sidewalks are in poor condition
 - Driver behavior and vehicle speed
 - Concerns around personal safety
- 
- People want:
 - More speed tables and raised crossings
 - Traffic calming
 - Trees and shade
 - ADA accessibility
 - Better street maintenance
 - Streetlights that work
 - Secure bike parking

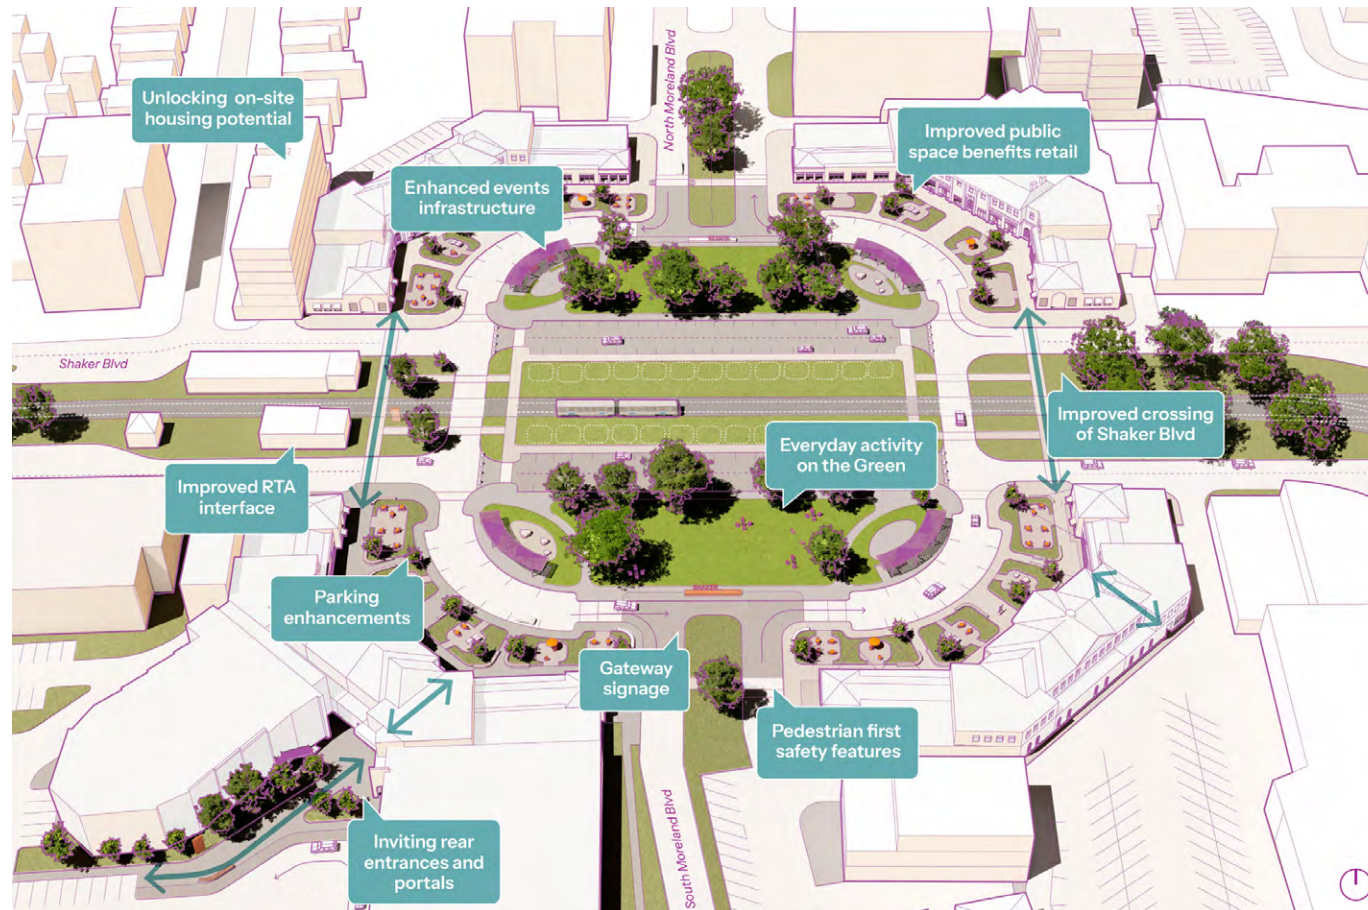

We have an opportunity to improve safety and quality of life

Shaker Boulevard from Woodhill Road to the Shaker Heights border is due to be repaved.

We want to respond to feedback by improving safety and mobility along the street.

We are also coordinating with other local plans along Shaker Boulevard

In 2025, the Shaker Square Vision Plan created a blueprint through public engagement for Shaker Square's future.

The current Shaker Boulevard project focuses on work within the public right-of-way that supports future investments.

What our work will include

-  Repave the street and add new street markings
-  Upgrade curb ramps, replace broken sidewalks, and repair curbs and aprons as needed
-  Improve existing crosswalks
-  Reduce traffic speeds using traffic calming tools
-  Make the street more comfortable for people riding bikes by reducing the road to one lane in each direction and creating a separated bike lane
-  Upgrade traffic signals
-  Replace water main from Shaker Square to the Shaker Heights border

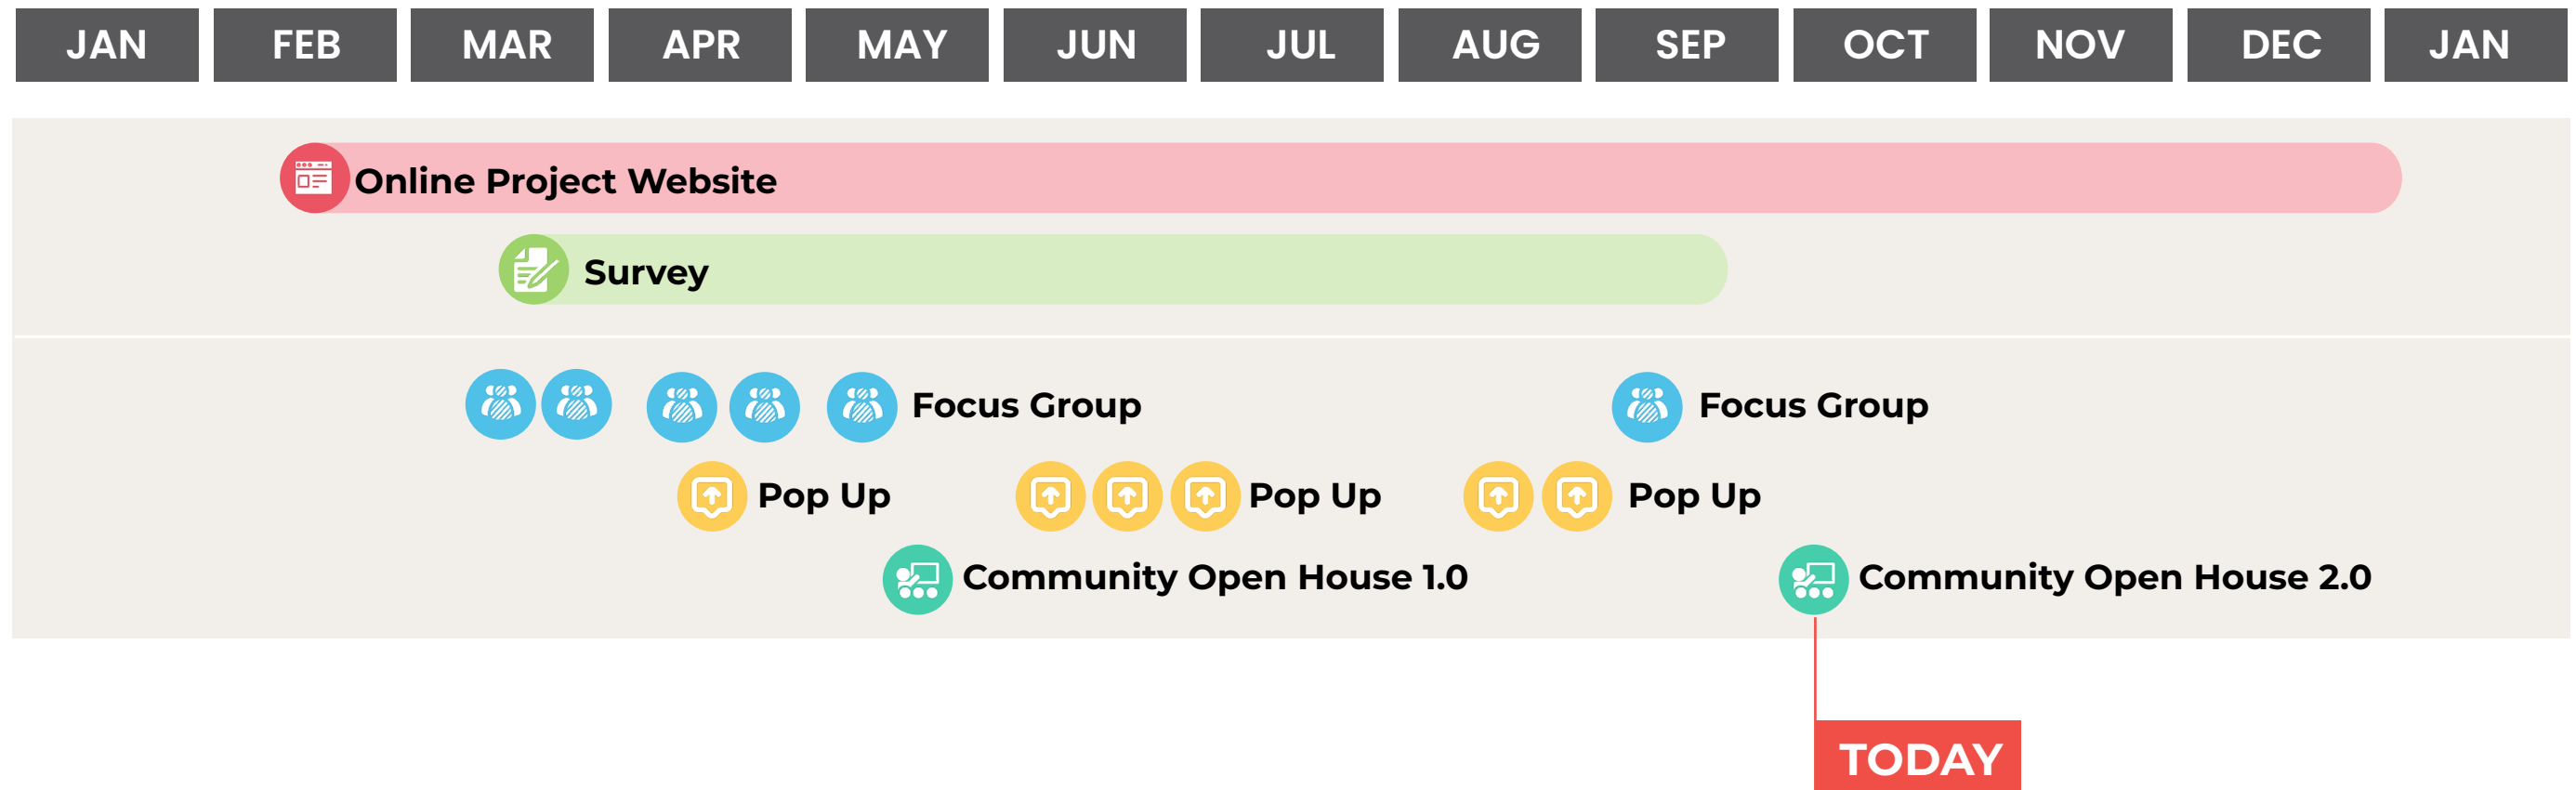

How much does this project cost and how are we funding it?

- Project funding sources:
 - Ohio Department of Transportation (ODOT) Urban Paving Funds
 - Ohio Public Works Commission (OPWC) State Infrastructure Funds
 - City of Cleveland Road and Bridge Bonds & Public Utility Funds

ESTIMATED COST
\$13.7M
total project investment

We began community engagement activities back in February

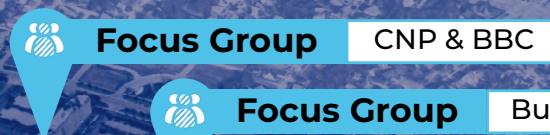

Including 15 local engagement events

**5/19/2026
5-7PM**

Survey respondents shared these top 6 concerns

1

Speeding vehicles and reckless driving

2

**Poor sidewalk conditions
— broken pavement,
insufficient green space**

3

**Safety crossing the street,
particularly near signalized
intersections**

4

**Safety for people biking
along the corridor**

5

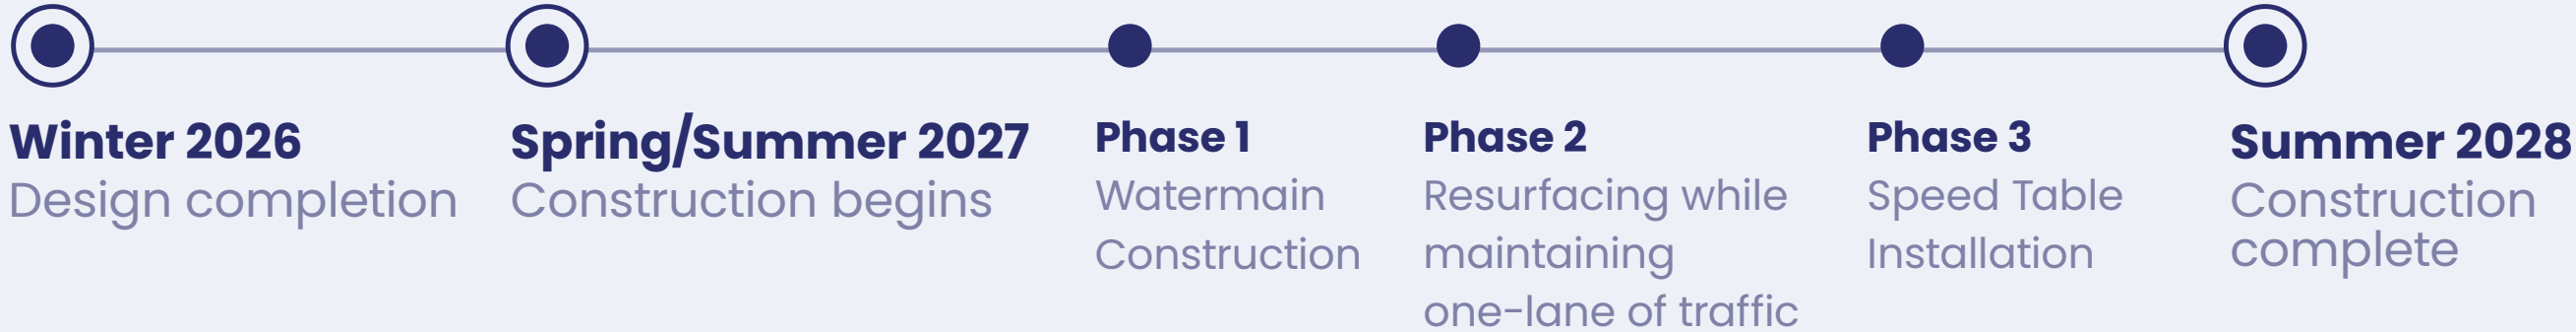

**Unsafe vehicle passing and
red/yellow light running**

6

**Poor or inadequate street
lighting**

What's next?

PROJECT TIMELINE

We want to hear from you!

- ① Review the plan and renderings.
- ② Fill out the comment card so we get the details right.
