Why Compost?

Reduce Landfill Waste

Over 40% of food in the U.S. is wasted. Composting food scraps instead of sending them to the landfill stops food from releasing greenhouse gas emissions into the atmosphere.

Heal Soil

Rust Belt Riders uses the food scraps they collect to create living soils that can be used to grow new food! We call it Tilth Soil. Check out our soils at tilthsoil.com. Composting members get 10% off!

Help the Community

Compost can help create a stable soil structure for future generations and closes the loop, recapturing the nutrients in food waste and putting them back into the earth.

This project was made possible by USDA's Composting and Food Waste Reduction Program.
